FTWW WANTS TO SEE WOMEN'S HEALTHCARE PRIORITISED, INCENTIVISED AND MANAGED EFFECTIVELY IN WALES

Making Women's Health a Priority will help the Welsh Economy

Women are:

- 52% of the population
- Primary care-givers for younger and older generations
- 50% of the UK workforce
- Growing faster as full-time employees than men.
- Burdened significantly with women's health conditions costing the UK economy billions annually

Despite this...

Women's Healthcare, including Maternity Services, is NOT MENTIONED in Welsh Government's long-term plan for health and social services, 'A Healthier Wales'

Wales must prioritise and effectively manage Women's Healthcare
through:

- 1) A bespoke Women's Health Strategy for Wales
- 2) A long-term, sustainable commitment to the Wales Women's Health Implementation Group (WHIG) & Programme (WHIP)
- 3) Women's Health Hubs
- 4) Training of Healthcare Professionals
- 5) The Mandatory Inclusion of Menstrual Wellbeing Education on the School Curriculum for Wales
